

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Atty. Docket: MOLLER=5

In re Patent of:)	Conf. No.: 5640
Jensen MOLLER et al.)	
U.S. Pat. No. 7,638,165)	Washington, D.C.
Issued: December 29, 2009)	July 15, 2010
For: METHOD OF TREATING A)	ATTN: Certificate of
SURFACE, COATING...)	Correction Division

REQUEST FOR CERTIFICATE OF CORRECTION UNDER 37 C.F.R. §1.322
AND §1.323

Honorable Commissioner for Patents
U.S. Patent and Trademark Office
Randolph Building, Mail Stop Post Issue
401 Dulany Street
Alexandria, VA 22314

Sir:

In checking over the printed copy of the above-identified patent, we have found the following errors, one of which was not the fault of the Patent and Trademark Office. It is respectfully requested that this error be corrected in accordance with 37 CFR §1.323. The remaining errors are printing errors on the part of the Patent and Trademark Office and should be corrected under 37 C.F.R. §1.322. The errors to be corrected are listed below.

The following errors were introduced by the USPTO in the printing of the patent. These printing errors are Office

In re of U.S. Patent No. 7,638,165

mistakes and do not appear in the national phase application as filed and were not introduced by any amendment by applicant:

Column 11, line 44-45, the phrase "a viscosity of, 16 mPa s", should read "a viscosity of 16 mPa s", as appearing in the originally filed specification at page 23, line 26.

Column 17, line 54, the phrase "dilutingagent" should read "diluting agent", as appearing in applicant's amendment of September 24, 2009, at page 5, line 5.

Column 19, line 44, the phrase "coatings are, applied", should read "coatings are applied", as appearing in the originally filed specification at page 38, line 12.

Column 24, line 6, the phrase "allowingthe" should read "allowing the", as appearing in applicant's amendment of September 24, 2009, at page 12, line 2.

In addition the following correction is to correct a typographical error on the part of applicant:

At column 24, line 22, the phrase, "40000 microns" should read "4000 microns". This error was introduced in applicant's amendment of September 24, 2009, at page 20, line 6. Support for the 4000 micron size film thickness can be found in original claim 88 of the originally filed application. The amendment was intended to insert into the specification the language of originally appearing claim 88, so as to replace the incorporation by reference to this claim number. It is clear that this error was of a typographical or clerical nature and/or of minor character, which occurred in good faith.

In re of U.S. Patent No. 7,638,165

Correction thereof does not involve such a change in the patent as would constitute "new matter" or would require reexamination.

The attached certificate of correction effects these corrections.

Submitted herewith is a credit card authorization in the amount of \$100.00 to cover the appropriate fee for corrections under 37 CFR §1.323. If insufficient fees are specifically authorized, please charge same to Deposit Account No. 02-4035.

Granting of this request is earnestly solicited.

Respectfully submitted,

BROWDY AND NEIMARK, P.L.L.C.
